Chromatographia Vol. 28, 1989 Subject Index

A
Acetyl content, 279
Adsorbents, NH_2-modified for TLC, 364
Adsorption, thermodynamics of, 588
Adsorption of alkanes and alkenes, 588
Adsorption on silica, 588
Aliphatic compounds,Vg of, 279
Alumina, modified for LC, 565
Amino acid sequencing, 92
Amino acids, capacity factors for, 553, 555
Amino acids, in fermented foods, 487
Amino acids, LC of, 337
Ammonia, m-toluamide derivative, 27
Amyris balsamfera, 126
Analysis of hops, 638
Analytical Artifacts - GC, MS, HPLC, TLC and PC, book review, 645
Anesthetics, metabolism of, 24
Anion-exchange, of egg proteins, 170
Arteriosclerosis, pathogenesis of, 69
Association constants, micelle-solute, 379
Asymmetry parameters, 9, 12
ATP degradation, 611
Auxillary levelling agents, in tanning, 397

B
ß-Carotene, LC of, 249
Biogenic Sulfur in the Environment, book review, 6645
Bleaching agents, in tanning, 394
Body fluids, catecholamines in, 78
Bonded phases, destruction of, 574
Brain infarction, 69
9,Bromomethylacridine fluorescence reagent, 267

C
Capacity factor in SFC, 253
Capacity factors, for amino acid derivatives, 479, 483
Capacity factors, for proteins, 568
Capacity factors, in SFC, 449
Capacity factors, of amino acids, 193
Capillaries, sealing of, 313
Capillaries, static coating of, 313
Capillary columns, for LC, 289
Carbon, activated, sampling on, 617
Carbon fibres, mesophase, 469
Carboxylic acid derivatives, 267
Carboxylic acids, fluorogenic labelling of, 367
Carotenoids, identification of, 129
Catecholamines, 69, 78
Catecholamines, in plasma, 307
Catecholamines analyser, automated, 417
Catecholamines in urine, 459
Cation-exchange extraction, 80
Cell walls, as filter membranes, 564
Cellulose acetate, DSC of, 279
Cellulose acetate stationary phase, 279
Ceratitis capitata attractants, 585
Charge transfer chromatography, 455
Chiral packing, evaluation of, 212
Chiral separations, 551
Chiral stationary phase, for LC, 481
Chiral stationary phases, 193, 212
Chirasil-L-Val, 487
Chlorinated methanes, sampling of, 617
Chlorinated phenols, capacity factors for, 466
Chlorinated phenols, LC of, 465
Chlorophylls, in spruce needles, 148
Chromatograms, deconvolution of, 263
Chromatographic conditions, interchange of, 285
Chromatographic principles, book review, 423
Chromatography, membrane separation, 561
Chromatography, two dimensional, 445
Chromatography of enantiomers, 425
Chromatography of lipids, book review, 424
Coffee, ultrasonic extraction of, 593
Cold trap effect in hot split sampling, 639
Colloidal particles, characterisation of, 31
Colloidal stationary phases, 556
Column, radial flow in, 157
Column liquid chromatography - see LC
Column overloading, 293
Column overloading, in LC, 161
Column packing, vesicular material, 561
Computer optimisation, 274
Conventional split injection, 641
Cosmetics, preservatives in, 34
Cottonseed extracts, cleanup of, 541
Counter ions, divalent cationic, 437
Counter ions, hydrophobicity of, 444
Counter ions, retention of, 444
CO_2, SF-extraction with, 400
CO_2 mobile phase, 449
Cyclodextrins, barbituric acid derivatives of, 445
Cyclodextrins, inclusion complexes of, 455

D
DABS-amino acids, 48
Data normalisation, 346
Denuder sampling, 27
Detection , selective, of 2-hydroxy acids, 484
Detection, amperometric, 78
Detection, coulometric, 359
Detection, diode array, 203, 341, 597
Detection, electrochemical, 307
Detection, electrosorptive, 5
Detection, fluorescence, 203, 303, 364, 497
Detection, fluorimetric, 375
Detection, fluorodensimetric, 516
Detection, polarographic, 605
Detector, LC, 341
Dicyclopentadiene dissociation, 300
Diffusion coefficients, 370
Diffusion in porous solids, 370
Diisocyanate derivatives, 15
Diisocyanate monomers, in polyurethanes, 15
Dimethylaminoazobenzenesulphonyl chloride, 45
Dissociation, kinetics of, 300
Distribution coefficients, 370
Dopamine in plasma, 307
Dropping mercury electrode, 5
Drug formulations, illicit, 623

E
Egg white proteins, 170
Elastomeric stoppers, hydrocarbons in, 545
Electron capture detector - see ECD
Electrophoresis, 92
Electrophoresis, of amino acids, 89, 92
Eluent, organic modifier, 133
Enantiomer interconversion, in LC, 263
End-capping, 574
Engelhardt test mixture, 19
Enzyme reactors as LC columns, 193
Enzyme reactors as LC detectors, 95
Ester derivatives, fluorescent, 367
Extraction, solid phase, of PAH, 203
Extraction cartridge, phenyl, 541

F
Field-flow fractionation, 31
Flame ionisation detector - see FID
Flavanoid glycosides from *Betalae* **folium**, 311
Flavour, book review, 223
Flavour volatiles, concentration of, 405
Flavour volatiles, GC of, 405
Flavour volatiles, LC of, 405
Flecainide, in plasma, 303
Flow interruptions, in LC, 189
Food samples, preparation for analysis, 488
Free energy, of methylene group, 237
Frog muscle, innervated, 610

G
Gas chromatography - see GC
Gas-solid chromatography - see GSC
Gaussian peaks, exponentially modified, 415
GC, capillary, 313, 385, 613
GC, headspace, of trace hydrocarbons, 545
GC, instrumental variables in, 385
GC, inverse, for solid surface studies, 469
GC, of alcohols, 179
GC, of aqueous solutions, 179
GC, of chloromethanes, 617
GC, of D-amino acids, 487
GC, of halocarbons in sediments, 613
GC, of homologous series, 237
GC, of hydrocarbons, 139
GC, of hydrocarbons in rocks, 613
GC, of local anesthetics, 24
GC, of organic bases, 179
GC, of PAHs in carbon black, 613
GC, of residual monomers, 167
GC, on aerosil, 556
GC, on carbon black, 556
GC, on colloidal stationary phases, 556
GC, on nematic liquid crystals, 556
GC, retention variation in, 502
GC, temperature programmed, 241
GC and LC, book review, 525
GC reactor, 300
GC separations, simulation of, 241
GC/FTIR, optimization of, 631
GC-MS, EI mode, 597
GC-MS, of herbicides and pesticides, 597
GC-MS, of polymer volatiles, 400
GC-MS, of vetiveryl acetate, 579
GC-MS of trace hydrocarbons, 545
GC-MS-MS, 579
GC-SFC coupling, 613
Gel electrophoresis, 39
Gel-filtration chromatography - see SEC
GPC, of glycosides, 497
Gradient elution, 183
Gradient system, for LC, 289
Graphite powder, 469
Grob, Kurt, award, 219
GSC, optimisation of, 274

H
Headspace GC/FTIR, 633
Heavy metals, trace analysis of, 315
Hemofiltrate, analysis of, 59
Heracleum genus fruits, 161
Herbicides, phenoxy alkanoic, 465
Herbicides and pesticides in soil, 597
Hexamethyldisilazane end-capping, 574
High-performance liquid chromatography - see LC
Homologous series, chromatographic properties of, 237
HPLC - see LC
HPTLC - see TLC
Hydrocarbons, reaction with silanols, 139

I
IC, detection in, 5
IC, of heavy metals, 315
Identification, automated, 341
IE, of naphthalene sulfonates, 437
IEC, automated, 487
IEC, of sialyl compounds, 59
Immobilised enzymes, 193
Interaction capacity, specific, 588
Ion chromatography - see IC
Ion-exchange chromatography - see IEC
Ion-pair chromatography, 34
Ion-pair chromatography, reversed phase, 437, 459
Ion-pairing, 367
Istvan Halasz, memorial symposium, 420

K
KF-dihydrate stationary phase, 179
Kinetics, effect of polar liquid phase, 300

L
LC, of racemic amino acids, 337
LC, book review, 320
LC, chiral resolution in, 551
LC, column efficiencies in, 569
LC, gravity flow, 249
LC, in clinical chemistry, review, 49
LC, in pharmaceutical quality control, 85
LC, of adenosine phosphates and products, 610
LC, of adriamycin, 375
LC, of adriamycinol, 375
LC, of aflatoxin, 541
LC, of aldehydes, 65
LC, of aliphatic compounds, 27
LC, of amino acid derivatives, 193, 212, 497
LC, of amino acid enantiomers, 477, 481
LC, of amino acids, 45, 89, 551
LC, of aromatic racemates, 505
LC, of atmospheric ammonia, 27
LC, of benzene derivatives, 379
LC, of carboxylic acids, 267, 367
LC, of carboxylic acid-5-hydroxytryptamides, 593
LC, of carotenoids and their esters, 129
LC, of catechol derivatives, 459
LC, of chlorophylls, 148
LC, of coffee components, 593
LC, of collagen metabolites, 497
LC, of corticosteroids, 623
LC, of creatinine, 605
LC, of diisocyanate monomers, 15
LC, of dinitrobenzene isomers, 412
LC, of dopamine, 307
LC, of drugs, 49
LC, of egg proteins, 170
LC, of enantiomers, 263, 505, 509
LC, of flavanoid glycosides, 311
LC, of flecainide, 303
LC, of foodstuffs, 95

LC, of furocoumarins, 161
LC, of γ-gliadins, 133
LC, of herbicide metabolites, 465
LC, of 2-hydroxy acid enantiomers, 481
LC, of hydroxylysine glycosides, 497
LC, of metabolites, 49
LC, of metal acetylacetonates, 519
LC, of methylisothiazolones, 34
LC, of methylnaltrexone, 359
LC, of naphthalene derivatives, 379
LC. of nucleic acid components, 493
LC, of nucleotides, 65
LC, of PAHs, 203
LC, of pesticides, 285
LC, of piroxicam, 197
LC, of plasma catecholamines, 69, 78
LC, of proteins, 565
LC, of provitamin A, 249
LC, of pseudouridine, 605
LC, of ribosomal proteins, 39
LC, of saccharides, 370
LC, of sialyl compounds, 59
LC, of tanning agents, 391
LC, of 1,3,5-triazine herbicides, 209
LC, of triglycerides, 183
LC, of trimedlure-related isomers, 585
LC, of wheat proteins, 133
LC, of (+)-B-eudesmol, 126
LC, on bonded phases, 574
LC, on chiral-coated silica, 477
LC, on immobilised enzymes, 551
LC, on modified alumina, 565
LC, preparative, 126, 129, 337, 497
LC, preparative, non-linear, 293
LC, preparative, simulation of, 293
LC, semipreparative, 585
LC, sorption equilibrium in, 189
LC, stationary phases for, 19
LC, substituent effects in, 513
LC, temperature effects in, 279
LC, with ternary mobile phase, 354
LC and electrophoresis compared, 89
LC apparatus, validation of, 85
LC capacity factors, effect of salts on, 494
LC cleanup procedure, 597
LC columns, comparison, 249
LC analysis of urine, 605
LC, of enantiomers efficiency of, 509, 511, 513
LC retention, effect of buffer salts on, 493
LC sample handling, book review,320
LC-MS, 623
LC-MS, PI mode, 597
Ligand-exchange chromatography, 337, 481
Low-boiling components, discrimination, 639

M
Mapping procedure, modified, 274
Metalloproteins, book review, 100
Methylnaltrexone, in rats, 359
Micellar phase-transfer catalysis, 267
Microbore columns, for LC, 289
Microwave sample preparation, book review, 223
Mobile phase, effect on adsorption, 170
Mobile phase, micellar, 379
Mobile phase, optimisation of, 285
Mobile phases, ternary, 354
Molar deformation polarisation, 469
Monomer, in polymers and polymer solution, 167
Myaxalin, anticoagulant, 157
Myocardial infarction, 69

N
NO mobile phase, 449
N-(1-pyrenyl)-bromoacetamide, 367

O
ODS absorbent, 405
Optimisation, computer assisted, 473
Organic bases, on silica, 9
Oxygen radical metabolism, 65

P
PAH, extraction of, 203
PAH, in environmental samples, 203
Paper chromatography - see PC
Peak asymmetry, 415
Peak half widths, prediction of, 241
Peak-width, at half-height, 415
Penicillin sulfoxide-bearing polymer, 505, 509, 511, 513
Peptides, separation of, 90
Pesticides, capacity factors of, 285
Pesticides, R_f values of, 285, 474
